Objective

Seeking a Full Stack Web Developer role where I can apply my coding expertise to create impactful digital experiences and contribute to the success of the team and company.

Experience

- **Brightcom group**   February 15,2023 - Current
  Full Stack Web Developer

Education

- **Guru Nanak Institutions Technical Campus**   2022
  B.Tech, Electronics and Communication Engineering (ECE)
  6.9

- **Narayana Junior College**   2018
  Intermediate
  8.9

- **Ravindra Bharathi High School**   2016
  10th grade
  8.7

Skills

- Javascript
- MySQL database
- HTML, CSS, Javascript
- Python, django
- React js
- Node js

Projects

- **Digital Marketing portfolio**
  Role : Developer
  The main purpose of our system is to make our Q-Project task easy and is to developed login page, Client details Form and Client Campaign Report. This document serves as the unambiguous guide for the developers to run their source code, if any difficulties faced during the usage of the test code. It manages multiple projects for a given client, focusing on the long-term consequences of the portfolio of projects it manages for the customer's business. The main
  Software requirements I have used for design this project is HTML5,CSS, Bootstrap, Javascript, MySQL,Python,Django.

- **Ott platform (Realm)**
  Role : Developer
  I have played a key role in development of an Over-The-Top (OTT) platform, delivering two versions to accommodate diverse client needs. Orchestrated the development of the first version using React for the frontend, Node.js for the backend, and MySQL for the database. And the second version's development with Python Django for the backend also with MySQL. Directed the implementation of core features including user authentication, content management, recommendation systems, payment gateways, and user profiles. Ensured scalability, security, and optimal performance across both versions. Technologies (Version 1): React.js, Node.js, Express.js, MySQL, HTML5, CSS3, JavaScript, Git, RESTful APIs.
  Technologies (Version 2): Python Django, React.js, MySQL, HTML5, CSS3, JavaScript, Git, RESTful APIs.
  Achievements: Successfully led the development of two versions of the OTT platform, catering to diverse client requirements. Implemented robust recommendation systems to enhance user engagement and content discovery. Ensured compliance with industry-standard security measures, safeguarding user data and transactions.

- **E-commerce website**

Role : Developer
I have played a role in development of an ecommerce website using React for the frontend, Node.js for the backend, and MySQL for the database. Oversaw the implementation of key features including user authentication, product catalog, shopping cart, checkout process, order management, and user profiles. Ensured the website's responsiveness, performance optimization, and security measures. Coordinated with the team to meet project milestones and deliver a high-quality solution.
Technologies: React.js, Node.js, Express.js, MySQL, HTML5, CSS3, JavaScript, Git, Bootstrap.
Achievements: Successfully delivered a fully functional ecommerce platform meeting client requirements. Implemented security best practices to safeguard user data and prevent vulnerabilities. Optimized website performance, resulting in reduced load times and improved user experience.
